Rails, React, Redux, TypeScript, PostgreSQL, Rspec, Docker, Jquery, Node.js, GraphQL, Bootstrap, Stimulus.js, Next.js, Ethereum, Web3

Work experience

Archive.com
Senior Staff Software Developer | 01/2022 - 12/2022

- Being an early core employee I had a hand in the hiring process, conducting **30+** rigorous technical interviews for the position of Senior Software Devs, which resulted in **3** accepted job offers. All of the hirees have been top-5 performers so far.
- Became a project manager for one of the company's product offerings - a Shoppable UGC Feed gallery, which has **200+** customers with a combined audience of **3+** million users.
- Performed a large-scale frontend refactoring, gradually adding TypeScript to the codebase which reduced the amount of bugs in production by an order of magnitude.

rabota08 | Elista
CTO | 09/2021 - 01/2022

- Launched the alpha version which has **1000+** daily website clients and **500+** telegram readers
- Formulated the business model and multiple revenue sources with the CEO. With the current growth trajectory it could generate **$10.000+** monthly revenue in a span of one year
- Participated in hiring a SMM team, whose efforts resulted in **200%+** increased daily viewers

Bonfire | San Francisco, California
Senior Full Stack Developer (remote) | 05/2021 - 09/2021

- Implemented an airdrops feature on blockchain which helped to attract dozens of new B2B clients and **tens of thousands of dollars** in Monthly Recurring Revenue
- Refactored parts of codebase, increased test coverage with Jest to **70%**, added sound typings which allowed to fix financial bugs and save thousands of dollars monthly on support
- Built a solid archectural foundation, based on Next.js, PostgreSQL, Redis for caching and Amazon SQS for background jobs

Busbud | Montreal, Quebec
Senior fullstack developer (remote) | 08/2019 - 05/2021

- Added support for selling train tickets, which increased the amount of sold tickets by **$100.000+** monthly
- Spearheaded a russian adaptation: collaborated with translators, designers and marketers to modify the website to russian privacy laws laws and partners' APIs. It's a huge market with **60+** millions of active internet users and a potential for **$10.000.000+** in additional revenue
- Refactored parts of legacy backend codebase with TypeScript, improved test coverage to **80%** with Jest, and reduced CI time by **30%** which allowed to iterate much faster

  Stack: TypeScript, Express.js, React.js/Redux, Jest, PostgreSQL, Docker.

Vayable | San Francisco, California
Full Stack Developer (remote) | 05/2019 - 08/2019

- Migrated legacy codebase from Rails 3 to Rails 5 in a span of **two months.**
- Moved to a React.js frontend, which allowed for many QoL features, improved performance and gave a foundation to mobile app

- Added JSON API with **30+** endpoints for the new frontend and partners
- Significantly improved test coverage with Rspec, FactoryBot and Capybara, which helped to reduce users' complaints by **80%**

Krypton Capital
Full Stack Developer | 12/2017 – 05/2019
jury.online - an escrow platform for safe investments in blockchain startups

- Developed a MVP of a web dashboard for Ethereum smart contract in a span of **4 months** from scratch
- Worked with Solidity developers to integrate smart contract with its **20+** public methods via Metamask Browser extension.
- Developed a JSON API with **40+** endpoints with accompanying Swagger documentation to be used by partners and upcoming React-based frontend

I was the only developer responsible for developing the dashboard in time before the ICO, and I have succeeded, helping the project to raise **$3.000.000+** in Ethereum investments.

buzz.im - a platform for advertising in Telegram messenger. Responsibilities:
- Optimized performance to achieve **90+** scoring on Google PageSpeed Insights
- Improved SEO to get into top 3 positions in Google Search with the relevant keywords
- Worked with the developers of a telegram bot with 20+ JSON API endpoints to integrate its capabilities into the platform
- Developed a JSON API with accompanying Swagger documentation, which is used by Vue.js frontend
- Worked with with designers on mockups for a design revamp, integrated the resulting 30 screens into the platform.

Freelance | New York, New York
Fullstack web developer (remote) | 02/2016 – 12/2017
Worked as a freelance Ruby on Rails developer under a guidance of Senior Software Developer from Zillow Group.

Built a template of a web application with Ruby on Rails that is being sold to startups in the real state business to help cut time for building MVPs in half

Education

KGU | Elista
